Hemoconcentrator Kits

Hemoconcentrator Kits

Nipro Canada's CardioMed™ Hemoconcentrator Kits combine our broad experience in building cardiovascular/perfusion kits with a high-quality Nipro hemoconcentrator membrane.

- ✓ Press-fit Hansen connectors are provided on the kit tubing for making ultrafiltrate and dialysate port connections.
- ✓ Rapid hemoconcentration rates. Virtually eliminates the need for a vacuum source.
- ✓ Biocompatible hemoconcentrator. Housing and fibers are not made with BPA or Bis (2-ethylhexyl) phthalate (DEHP).
- ✓ Hemoconcentrator membrane is made of POLYNEPHRON™, a polyethersulfone (PES) material, made exclusively by Nipro.
- ✓ Kits are available in ultrafiltrate and dialysate-enhanced configurations.
